Professional Summary

Data, Strategy, and Transformation Specialist with advanced expertise in enterprise data and process architecture. I design and deliver scalable cloud-native frameworks that transform complex organisational data into strategic advantage—driving confident investment decisions, optimised resource planning, and measurable digital transformation outcomes. By combining AI automation, advanced modelling, and robust governance frameworks, I enable executives to navigate complexity with precision and speed while maximising business intelligence capabilities.

My experience spans frontline operations, financial crime, compliance, technology modernisation, and digital transformation initiatives across multiple strategy teams—giving me a distinctive end-to-end perspective on how data drives delivery in complex organisational ecosystems. Having worked within diverse corporate architectures, I possess a robust institutional knowledge with a strong commitment to continuous learning, demonstrated by an extensive portfolio of certifications and courses across AI, analytics, and reporting. This ensures I stay on top of emerging practices and consistently implement the latest methodologies—keeping my solutions innovative, efficient, and aligned with best practice standards.

Technical Expertise

- Advanced analytics & AI: Python, SQL, Spark; deploying LLMs, Generative & Agentic AI
- Data visualisation & BI: Power BI; delivering enterprise-grade reporting solutions tailored for ELT
- Cloud & pipelines: Data modelling, architecture, designing scalable, automated systems
- Program management tools: MS Project, Clarity, Rally, MS 365, Copilot; driving complex initiatives
- Agile & governance, QA protocols, enterprise standards

Strategic & Business Impact

- Executive stakeholder engagement and reporting, and C-suite communication
- Regulatory compliance and transformation delivery
- Translating analytics into actionable recommendations and measurable outcomes
- Multi-disciplinary problem-solving combining creativity, rigour, and strategic insight
- Continuous upskilling and adoption of cutting-edge AI, data, and governance best practices

Professional Experience

Senior Consultant – Strategic planning

National Australia Bank – Transformation | 2026

- Delivered strategic analytics and forecasting for enterprise-wide transformation programs, guiding capital allocation and optimisation across payments, technology modernisation, and simplification portfolios.
- Led end-to-end data flow, architecture, and governance design, from use-case definition and requirements traceability to executive-ready reporting that enabled confident investment decisions and value realisation.
- Designed and implemented enterprise reporting and analytics frameworks, integrating data across complex systems to improve transparency of transformation outcomes, risk management, and customer-centric strategy alignment.
- Developed and governed data models, schemas, and reporting logic, ensuring security compliance and sustainable reporting for debt reduction, legacy decommissioning, and modernisation initiatives.
- Acted as a strategic interface between business and technology, translating complex requirements into scalable, cloud-aligned solutions consistent with target-state architecture.
- Advanced modernisation and business outcome tracking using weighted progress metrics and governance frameworks, directly supporting investment and divestment decisions.

Senior Consultant – Technology Modernisation

National Australia Bank - Enterprise Reporting & Insights | 2025 – 2026

- Engineered multi-scenario planning models integrating cost-benefit projections, application and project lifecycle data, and strategic pacing assumptions across multiple fiscal periods—supported by advanced Power BI dashboards that visualised model outputs and enabled executive-level decision support.
- Designed and deployed a scalable strategic reporting solution integrating data from Rally, Clarity, and other sources—combining weighted aggregation models to track Business Outcome progress and Epic lifecycle stages while aligning delivery performance with Agile maturity and strategic attribution.
- Transformed manual reporting packs into automated Power BI dashboards with dynamic filters, interactive visuals, and governance-ready outputs—partnering with domain stakeholders to refine design and logic, ensure alignment with business priorities, and promote organisation-wide scalability.
- Provided roadmaps to document, design, and implement scalable reporting systems, guiding teams through integration of multiple data sources, enabling sustainable deployment across programs.
- Advised stakeholders on overcoming data hygiene, structure, and system limitations—identifying obstacles and designing practical solutions to improve reporting reliability, metadata management, and long-term data health.
- Developed and maintained a sandbox development environment, conducted validation against source systems, authored a comprehensive data strategy, and ensured reporting sustainability through access controls, SharePoint integration, and full documentation of schema, DAX logic, and model assumptions.

Senior Associate – Intelligence

National Australia Bank - Financial Crime Risk Mitigation | 2023-2025

- Produced over 100 intelligence, risk and product exploitation assessment reports.
- Utilized data expertise for independent data mining and end-to-end production of assessments.
- Acted as liaison between data teams and enterprise-wide non-technical divisions.
- Developed business intelligence products including Power BI dashboards, converting static reports into interactive and dynamic insights.
- Streamlined workflows, automating responses to internal and external requests.
- Performed operational assessments, identifying gaps and recommending improvements.
- Facilitated cross-functional working groups to enhance cooperation, manage stakeholder expectations.
- Designed and implemented data validation processes to improve the integrity and accuracy of financial crime intelligence reports.
- Developed SQL scripts to enhance data extraction and analysis for intelligence reporting, integrated OSINT methodologies into investigations, improving detection processes.

Senior Associate – Sanctions List Management

National Australia Bank – Financial Crime Detection & Innovation | 2021 - 2023

- Maintained and updated Sanctions lists in a fast-paced global regulatory environment.
- Analysed and enhanced sanctions frameworks aligned with regulatory bodies (US/UK/AUS).
- Developed methodologies for identifying evasion tactics in virtual and digital assets.
- Designed and implemented automated detection processes for sanctioned cryptocurrency wallets, ensuring compliance with evolving regulatory landscape.

Associate – Monitoring & Investigations

National Australia Bank - Financial Crime Operations | 2019 – 2021

- Conducted investigations into a range of customers including but not limited to PEPs, trusts and other high-risk entities and complex ownership structures.
- Assessed correspondent banking relationships in line with AML/CTF Program requirements.
- Provided customer risk analysis, referrals, and recommendations for exits.

Education

Graduate Diploma in Education

University of Adelaide (2010)

Bachelor of Science in Economics

Tehran, Iran (2004)

Licenses & Certifications

Technical & Data-Related:

- **Business Intelligence & Data Analytics:**
Power BI for Data Analysts (Microsoft Press, 2024)
Career Essentials in Data Analysis (Microsoft, 2024)
- **SQL & Databases:**
SQL for Data Analysis (LinkedIn, 2024)
SQL Essential Training (LinkedIn, 2024)
- **AI & Machine Learning:**
Machine Learning (Stanford & DeepLearning.AI, 2023)
Generative AI with Large Language Models (DeepLearning.AI, 2023)
Python for Data Science, AI & Development (IBM, 2023)
Artificial Intelligence using IBM Watson (IBM 2023)
- **Cybersecurity & Web3:**
Cybersecurity Awareness: Phishing & Whaling (LinkedIn, 2021)
Threat Modelling & Securing Cryptocurrencies (LinkedIn, 2021)

Financial Crime & Risk:

- **AML & Financial Crime:**
Certified Anti-Money Laundering Specialist (CAMS – ACAMS, 2020)
Certificate in Fighting Modern Slavery and Human Trafficking (ACAMS – 2022)
Cryptocurrency Financial Crime Compliance (2021)
Cryptocurrency Forensics & Investigation (2021)
- **Regulatory Compliance & Risk:**
Professional Banking Fundamentals (FINSIA, 2023)
International Cooperation & Legal Assistance (Basel Institute, 2021),
Operational Analysis of Suspicious Transactions (Basel Institute, 2021)
